

PROJECTS

NEON MUSEUM LAS VEGAS

The Neon Museum is a key piece of downtown's revitalization. Complete remodel of the historic La Concha motel lobby reimagined as a welcoming space to the Neon Boneyard for daily tours. The project also includes the building addition for office space, educational programming, courtyard canopy for outdoor events and public restrooms completed on time and within budget. The Neon Museum is another Las Vegas "iconic stopping spot" for tourists.

CLARK COUNTY FIRE STATION #16

The new Fire Station #16 which replaces the old station is a prototype for future facilities in Clark County. This 11,869-square-foot three-bay station built with a separate dorm room wing with eight individual rooms, three shower/restrooms, Captain's quarters, training and exercise room, storage tele/data rooms, outdoor trellis at the patio area with built-in barbecue. As an emergency response facility, the entrance is easily identifiable to accommodate walk-up emergencies.

BOYD GAMING LAUNDRY FACILITY

The Boyd laundry facility in Las Vegas, Nevada was built in a renovated warehouse under a fast track contract. The facility is a single story, 100,000 square-foot structure consisting primarily of open warehouse space that houses heavy duty laundry cleaning equipment. The completion of this project was accomplished within 10 months from the design concept to full operation. After successfully completing within budget and quality, the facility achieved certification under the United States Green Building Council (USGBC) Leadership in Energy and Environmental Design (LEED version 2.2) program.

PARKDALE COMMUNITY CENTER

The Clark County Parkdale Community Center project consists of a new 11,907 square-foot Recreational building which includes a multipurpose/classroom, office space, half-gymnasium, exercise rooms, game room, storage rooms, and restrooms. Features include daylight harvesting techniques using glazing, an Energy Management System, vertical sectional doors inside and out, translucent glazing around fitness area. The new addition is safe, flexible, functional, maintainable, respectful to the environment and responsive to the evolving needs of Parkdale Community in East Las Vegas.

PROJECTS

FIRE STATION #26

This project was for the construction of a new fire station in Las Vegas. The work consisted of construction of a new building of 10,000 square feet. The construction included, but was not limited to; underground utilities, plumbing, HVAC, electrical power, emergency generator, data systems and lighting. Despite the 100-year flood of 1999, the building was deemed completed within the time schedule.

#31 DIVISION POLICE STATION

The Metropolitan Toronto Police department required a new police station in a new development of a raw rural site North of Toronto. The project incorporates special structural provisions for each of installation and arrangement of jail equipment. Extensive specialized security hardware provisions were required, along with sophisticated centralized control measures.

METRO POLICE MARINE HEADQUARTERS

The old Toronto Harbour Police Building and boathouses were replaced with a new building for use by the Metro Police Headquarters including a new emergency department, garage and boat storage, and the replacement of the deteriorated basin timber sheetpiling with steel sheetpiling placed all around. Special environmental requirements, Navigable Waters Protection Act and other bylaws were of essence in order to successfully complete the project within defined quality, schedule and budget.

WEST CREDIT SECONDARY SCHOOL

The Board of Education required Extensive fully equipped and modern Secondary School to provide technical skills to more than 800 students, including wheelchair accessibility throughout all support facilities included classrooms, training workshops, laboratories, dietary, health-care, greenhouse, administration, theatre, maintenance, etc. Site traffic, parking system and sports fields were carefully designed.
